

BEAUTY BY BOLE BOUTIQUE & CLINIC

MEDICAL, CLINICAL & TREATMENT DISCLAIMER

Important information for clients and website visitors

PLEASE READ: This document provides general information about treatment suitability, professional assessment, informed consent, risks and individual outcomes. It does not replace personalised medical advice or emergency care.

1. Purpose of This Disclaimer

This disclaimer applies to the aesthetic, beauty, wellness, prosthetic and clinical services provided or promoted by Beauty By Bole Boutique & Clinic. It is intended to help clients understand the nature of the information presented on this website and the importance of an individual professional assessment before treatment.

2. Professional Assessment & Treatment Suitability

Your safety, wellbeing and individual needs are our priority. Treatments are provided by appropriately qualified professionals within their scope of practice and, where appropriate, following an individual consultation, health assessment and suitability check. A treatment may be modified, postponed or declined where it is considered clinically inappropriate, contraindicated or unsafe.

3. Website Information Is Not Personal Medical Advice

Information on this website is provided for general educational and informational purposes. It does not replace a personalised consultation, diagnosis, examination or professional medical assessment. Website content should not be relied upon as a substitute for advice from a suitably qualified healthcare professional.

4. Benefits, Risks & Individual Results

Expected benefits, limitations, material risks, possible side effects, aftercare requirements and reasonable alternatives will be explained before treatment where appropriate. Individual responses vary, and no specific result, aesthetic outcome or therapeutic benefit can be guaranteed.

5. Client Responsibilities

Clients are responsible for providing accurate, complete and current information relevant to their care, including medical history, current or recent medicines and treatments, known allergies or sensitivities, pregnancy or breastfeeding status, previous treatment reactions and any other relevant health information. Failure to disclose relevant information may affect treatment suitability and safety.

6. Consent & Right to Decline

Before treatment, clients will have the opportunity to ask questions and receive information necessary to make an informed and voluntary decision. Consent may be withdrawn before or during treatment, subject to the clinical safety of stopping the procedure and any applicable professional or legal requirements.

7. Relationship With Ongoing Medical Care

Our services are not intended to replace necessary medical care, emergency treatment or prescribed medication. Clients should continue prescribed treatment unless advised otherwise by an appropriate healthcare professional. Where a concern falls outside the scope of our services, clients may be advised to seek assessment from an appropriate clinician.

8. Emergency & Specific Medical Concerns

This website is not an emergency medical service. For urgent or emergency symptoms, seek appropriate emergency medical care without delay. For a specific medical concern or uncertainty about whether a treatment is suitable for you, consult a qualified healthcare professional.

9. Treatment-Specific Information & Consent Forms

This disclaimer should be read together with the information provided for the specific treatment being considered and the relevant client consultation and consent documentation. Treatment-specific requirements may include additional contraindications, precautions, risks and aftercare instructions.

Beauty By Bole Boutique & Clinic is committed to professional, respectful and client-centred care. The information above is intended to support informed decision-making and should be considered alongside the relevant consultation, treatment information and consent documentation.

For specific medical concerns, please speak with a qualified healthcare professional. In an emergency, seek appropriate emergency medical care.
